436 It will perhaps be of some interest to note here that the peoples of Laos have no respect for European gold coins, [420] because their gold 822 is alloyed with copper! In this country, as in all of the Far East in 439 general, it is thought that gold is the noble metal par excellance, that 177 it is polluted and diminished by alloying it with copper, which is unworthy of it, and that it can endure being made into an alloy only with silver.

The only "gold" coins in use, and still not at all currently in northern Laos, are books of gold leaf the thickness of tinfoil. They come from China and bear the official stamps of the country's banks which put them into circulation as "merchandise" in the same way as bars of silver.

Weighing instruments

405 The weighing instruments used in Laos include the "Ta-Dieng" or "Sing," a Chinese steelyard made of wood which has three rows of graduations. It may have a hook or a single platform, and is used for weights ranging from one "Sang" (1.23849 kilograms) up to several piculs.

For weights of less than a "Sang" the same kind of Chinese steelyard, with a hook or platform, is used, but it is smaller and made of ivory or bone.

A small pair of beam scales with platforms shaped like cupels, which is called "Sing-Dieng," is used mainly for weighing precious metals and gems.

There are several series of weights for balances. They are made of bronze, iron or copper and are most diverse in shape, representing elephants, imaginary birds, hexagons, pentagons, cones, pyramids, etc.

2. TRADE COMMODITIES AND PRODUCTS OF EXCHANGE

438 Since there is no industry to speak of in Laos, the local products 241 which make up the basic commodities of interior trade and exports come mainly from agriculture, livestock raising, scavenging, fishing and hunting. Mention may be made, however, of certain products of local, not to say familial, industry which enter into interior commerce and to some extent into the trade which goes on with neighboring countries.

438 [421] These include cloth goods of pure silk, either plain or 433 spangled with gold, goods of silk blended with cotton, and wholly cotton goods, then articles of jewelry and goldsmithing, and finally metals and ores from the still rudimentary mining industry and pottery goods, edge-tools, basketry, etc.
